

## Questionnaire:

To have your program listed for potential traveling fellows, please specify which fellowship(s) you are willing to sponsor:

**International Traveling Fellowship in Pediatric Neurosurgery (3 months)**

**Resident Traveling Fellowship in Pediatric Neurosurgery (1 month)**

### SPONSORING INSTITUTION

Name of Institution/Program:

Name of Program Director:

Address:

Telephone:

Fax:

Email:

Website URL:

Please attach a 150-250 word description of your program, including the number of faculty/attendings, number and type of trainees, clinical volume, specialty practices, parent institution, geographic location, and any other details you feel may help a potential candidate gauge their suitability to your program. If you have a Web page(s) to your Pediatric Neurosurgery Service, please provide the URL in the space provided above, and we will link to your site on the AANS/CNS Joint Section for Pediatric Neurosurgery website for potential applicants. Sponsors must be willing to provide a letter of acceptance from the institution confirming the description of the fellow's anticipated activities during the period of the award.

Please email the completed form to the Training Subcommittee Chair Matthew Smyth at [smythm@wudosis.wustl.edu](mailto:smythm@wudosis.wustl.edu).

The Johns Hopkins University Division of Pediatric Neurosurgery treats patients at the newly erected Charlotte R. Bloomberg Children's Center, a state-of-the-art 205-bed children's hospital in Baltimore, Maryland. We are comprised of three full-time pediatric neurosurgeons, Dr. George Jallo (Director), Dr. Edward Ahn, and Dr. Eric Jackson. In close association with the Department of Neurosurgery, several adjunct faculty members operate to offer complete a comprehensive program in the treatment of pediatric neurosurgical disorders, including pediatric brain and spinal cord tumors, spinal dysraphism, congenital malformations, craniosynostosis, epilepsy, spasticity, hydrocephalus, complex vascular disorders, skeletal dysplasias, complex pediatric spinal disorders, traumatic injury, and brachial plexus injury. Our daily clinical service team includes three physician assistants, two senior-level residents, a post-graduate fellow, sub-interns, and medical students. Residents from the University of Maryland rotate on clinical service. We perform over 600 operative cases per year. We offer a three-month fellowship for international residents in neurosurgery. The fellow also has the option to be involved in research projects in neuro-oncology, hydrocephalus, or surgical outcomes.
