Re: AANS/CNS Pediatric Section Traveling Fellowship in Pediatric Neurosurgery

Texas Children’s Hospital (TCH) in Houston is one of the largest and highest ranked children’s hospitals in North America, with 7 full-time pediatric neurosurgery faculty. Approximately 1000 major neurosurgical cases per year are performed at TCH, which spans the range of pediatric neurologic conditions. Our faculty members are each focused on subspecialty innovation, in epilepsy, tumor, fetal, hydrocephalus, endoscopy, craniofacial, neurovascular, congenital, movement disorders, spine, and trauma. The one-year clinical fellowship in Pediatric Neurosurgery is accredited by both the ACPNF and the SNS. The academic affiliation is with the Baylor College of Medicine (BCM), and TCH is one of 5 teaching hospitals that comprises the BCM neurosurgery residency program. There is a rigorous academic program and a focus on teaching. Our fellow is appointed as Clinical Instructor and functions as junior faculty. Applicants interested in an academic career are given priority.

Sincerely,

Howard L. Weiner, MD, FACS, FAAP, FAANS
Chief of Neurosurgery
Texas Children’s Hospital
Professor and Vice Chairman of Neurosurgery
